### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the presently claimed invention distinguishes over the prior art of record for multiple reason including some of those discussed below. The present invention discusses a system that "passively recognize[es]" a plurality of contacts communicating with a member, which the applicant says is not monitoring the communication between users to determine if the number of messages exchange exceed a threshold of messages, as argued in applicants arguments dated 9/27/2010, page 12. Also the present invention also states the presently claimed invention identifies the plurality of contract that have been passively recognized as a group that have been repeatedly sent messages. Then the present invention creates a contact list that includes the plurality of contacts for addressing future communication. This list is then associated with a group name that the member is able to use to address the contact list of that was identified passively.

The present claimed invention distinguishes over the prior art, because much of the prior art is designed to identify contact based on the number of communications that occur between individual users, Once this threshold is reach they are usually added to a stored contact list. When the user goes to send a message the user is able to check from a box usually in the art or a similar means of selecting users without having to write the entire name in the to box of the electronic message. The present invention does not just identify contact, but identifies a plurality of contacts into a group, Which the member is able to identify by name. Additionally, the prior art requires a more active participation by the user, in that the user is able to create a group by selecting from a list of contacts

the user has previously sent message to or received message from to create a group that the user would label with a name for future use. Therefore for the reason discussed among other the present invention distinguishes over the prior art of record.

Examiner notes that in claim 19 applicant claims a computer readable medium having instruction stored thereon, which is defined in the specification as not including signals in pages 6, 21 & 22 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached Notice of references cited (if appropriate).
